Foreword.....	3
1 Scope	9
2 Normative references	9
3 Terms and definitions, abbreviations	11
3.1 Terms and definitions	11
3.2 Abbreviations	13
4 Basics of quality management	14
4.1 Importance of quality in FM	14
4.2 Criteria, background, elements and influences to quality	14
4.3 Type of Characteristics	15
4.4 Pathway from needs to experiencing Delivery	16
4.5 Quality Management	18
5 Process of quality management	19
5.1 General introduction of the process	19
5.2 Demand	20
5.3 Determining and defining requirements	20
5.4 Service Level	22
5.4.1 General	22
5.4.2 Organizing requirements into facility products	22
5.4.3 Elements of a Service Level	22
5.4.4 Principle and approaches of defining Service Levels	23
5.4.5 Types and classification of Service Level	23
5.4.6 Service Level life cycle	24
5.5 Developing measurement metrics (hierarchy of indicators)	24
5.5.1 Purposes of developing metrics (structured indicators)	24
5.5.2 Various types of indicators	25
5.5.3 Attributes of indicators	27
5.5.4 Recommendation for designing a metrics	28
5.5.5 Indicators selection criteria	29
5.5.6 Required properties of indicators	30
5.5.7 Data gathering techniques:	31
5.5.8 Indicators domains/categories	31
5.6 Quality aspects by organizing delivery of facility products	32
5.7 Quality aspects by delivering facility products	33
5.8 General introduction into performance management	33
5.9 Measurement and calculation	35
5.10 Analyze deviation	35
5.11 Actions based on deviation	35
5.12 Continuous improvement	36
Annex A (informative) GAP-Model	37
Annex B (informative) Categories of indicators	38
